8. Exposure Controls/Personal Protection

The product does not contain quantities of material with critical values that have to be monitored at the workplace. The lists valid during the making were used as basis.

Avoid contact with the eyes and skin. The usual precautionary measures are to be adhered to when handling chemicals. Use rubber gloves; the selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application. The exact break through time has to be found out by manufacturer of the protective gloves and has to be observed.

Eye protection is not required.
